CarePartners Rehabilitation Hospital Traumatic Brain Injury Program Outcomes

**TYPES OF PATIENTS SERVED**
In 2014, CarePartners Rehabilitation Hospital served 76 patients with a traumatic brain injury (TBI). Age ranges of TBI patients cared for in our Brain Injury Specialty Program are depicted in the graph to the right:

- 18-44 years, 10
- 45-64 years, 28
- 65-74 years, 14
- 75+ years, 30

**WHERE OUR PATIENTS GO AFTER REHAB**
Our goal is for our patients to return to a community setting whenever possible. Many times this is dependent upon the support and availability of caregivers in the home, so we work closely with families to teach them how to care for their loved one at home. The graph to the right depicts our patient discharge destinations:

**HOW OUR PATIENTS IMPROVE**
We use a scoring system known as the FIM™ that measures the improvement patients make in specific functional tasks such as eating, personal care, walking, communicating and memory. The graph below shows the average FIM points gained during a stay at CarePartners Rehabilitation Hospital compared to a stay in other rehabilitation programs across the country:

**MEETING REHAB GOALS**
Our patients are the most important members of the rehab team. We begin to talk with them about what they want and need to accomplish through their rehab program even before they are admitted. Individual goals are established with all team members. Last year, of 82 patients who completed their rehab program, 73 (89.4%) met their individual goals.

**HOW LONG OUR PATIENTS STAY**
Our patients stay in our inpatient rehabilitation program on average 12.5 days, compared to a national benchmark of 14.2 days. While our length of stay is shorter than the benchmark, our patients' functional improvement was higher, as depicted to the left below.

**SATISFACTION**
Feedback from our patients and families is very important to us. Results from our most recent satisfaction survey show CarePartners Rehabilitation Hospital ranked higher than 98% of other inpatient rehab programs who participate in the survey. In other words, we ranked in the 99th percentile for our satisfaction scores.
